

GLYCOLIC 30% PEEL

ACTIVE INGREDIENT - Trichloroacetic Acid

- Glycolic 30% Peel is a medium-strength Alpha Hydroxy Acid (AHA) chemical peel designed for enhanced exfoliation and accelerated skin renewal. With a higher concentration of glycolic acid, it penetrates deeper into the epidermis to effectively target pigmentation, acne marks, uneven texture, and early signs of aging.
- Ideal for patients who have prior peel experience, this peel delivers faster, more visible skin rejuvenation with controlled downtime.

INDICATION

- Light to Medium Superficial Peel Mild Acne
- Uneven Texture
- Early Pigmentation
- Enlarged Pores

BENEFITS

- Stronger exfoliation for deeper skin renewal
- Noticeable improvement in pigmentation & tanning
- Reduces post-acne marks and blemishes
- Controls active acne and excess oil
- Refines enlarged pores
- Improves uneven skin texture
- Softens fine lines and mild wrinkles
- Boosts collagen production
- Enhances overall skin clarity and glow
