# Retipeel Exo<sup>TM</sup>

Exosome Powered Encapsulated **Yellow Peel**

**Skin lightening | Deep Dermal Regeneration**

## Kit contains

Brush

Finger  
gloves

Headband

Pack size.  
**30gm**

MRP.  
**18000/-**

## Unique & Advanced Peel Formula

**Vitagaurd<sup>®</sup> A**

**Kojic acid**

**Lactosome 55**

**Arbutin**

**Vitamin C**

**Phytic acid**

**Lactic acid**

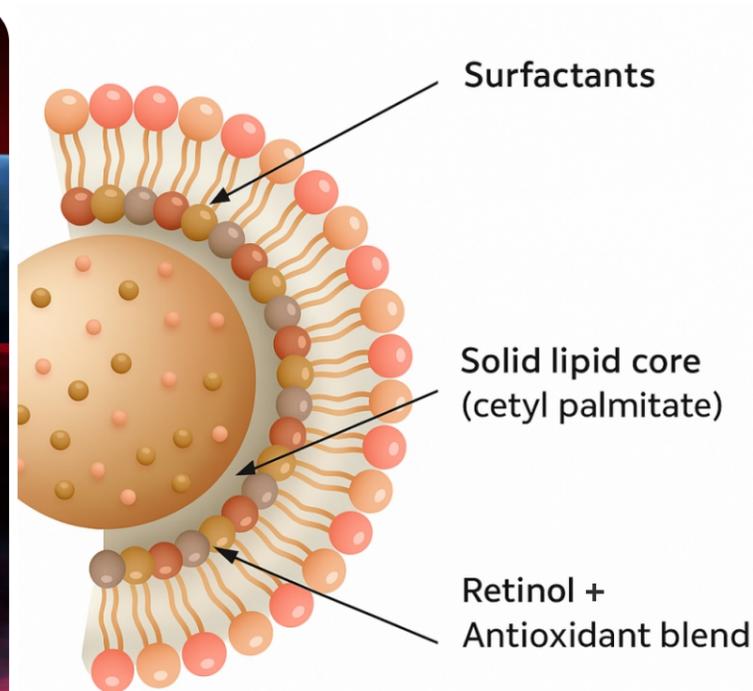

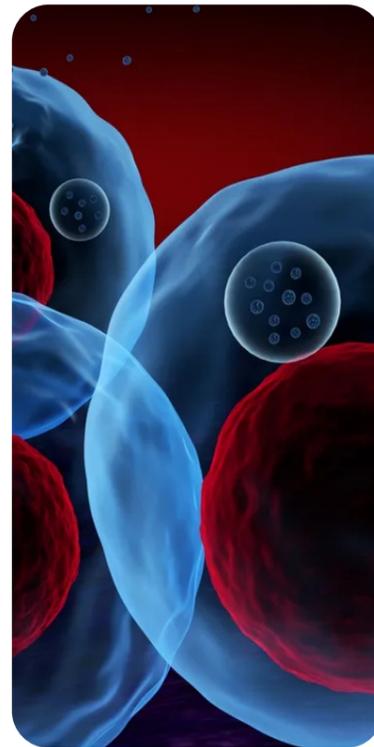

**Mandelic acid**

**Salicylic acid**

# Exo-Vita Technology

## Unique Combination of Exosomes & Patented Vitagaurd (Retinol) Encapsulation

### Exosomes (Lactosome55)

Source: Patented micro-organism  
Lactobacillus brevis J2K-55  
Size: 128 nm (Avg)

- ✓ Ensures complete Skin regeneration
- ✓ Gives excellent skin barrier improvement
- ✓ Promotes barrier & hydration junctions  
Filaggrin | Loricrin | Claudin 1 | Aquaporin 3
- ✓ Gives strong skin brightening effect
- ✓ Exerts Powerful anti-inflammatory effect

### Vitagaurd<sup>®</sup> A

Retinol is encapsulated in Solid Lipid Particles (SLP's) + Antioxidant base by PIT method

- ✓ 100% stable at room temperature
- ✓ 178% higher penetration than normal Retinol
- ✓ Prevents retinol induced inflammation
- ✓ Increases epidermal thickness
- ✓ Stimulates type I & III collagen
- ✓ Proven in wrinkle reduction, Improves elasticity, promotes even skin tone

# Lactosome 55

## Exosome Powered Yellow Peel

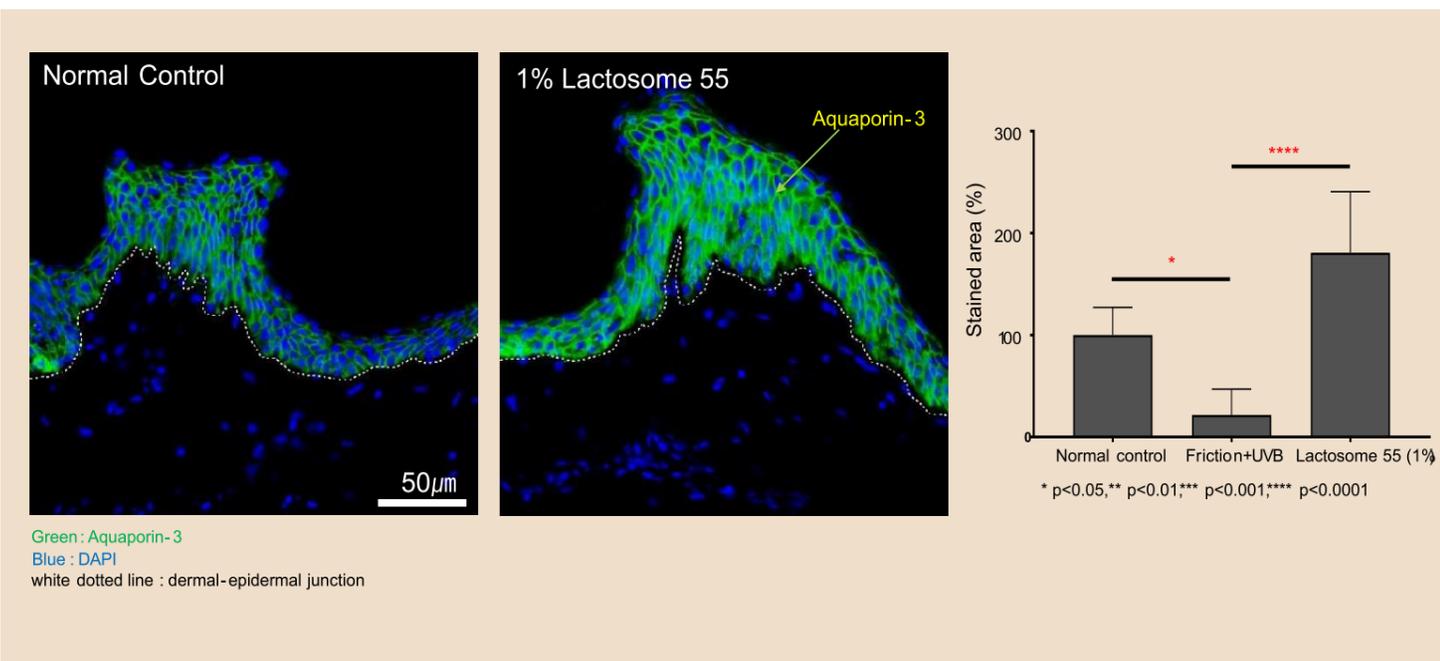

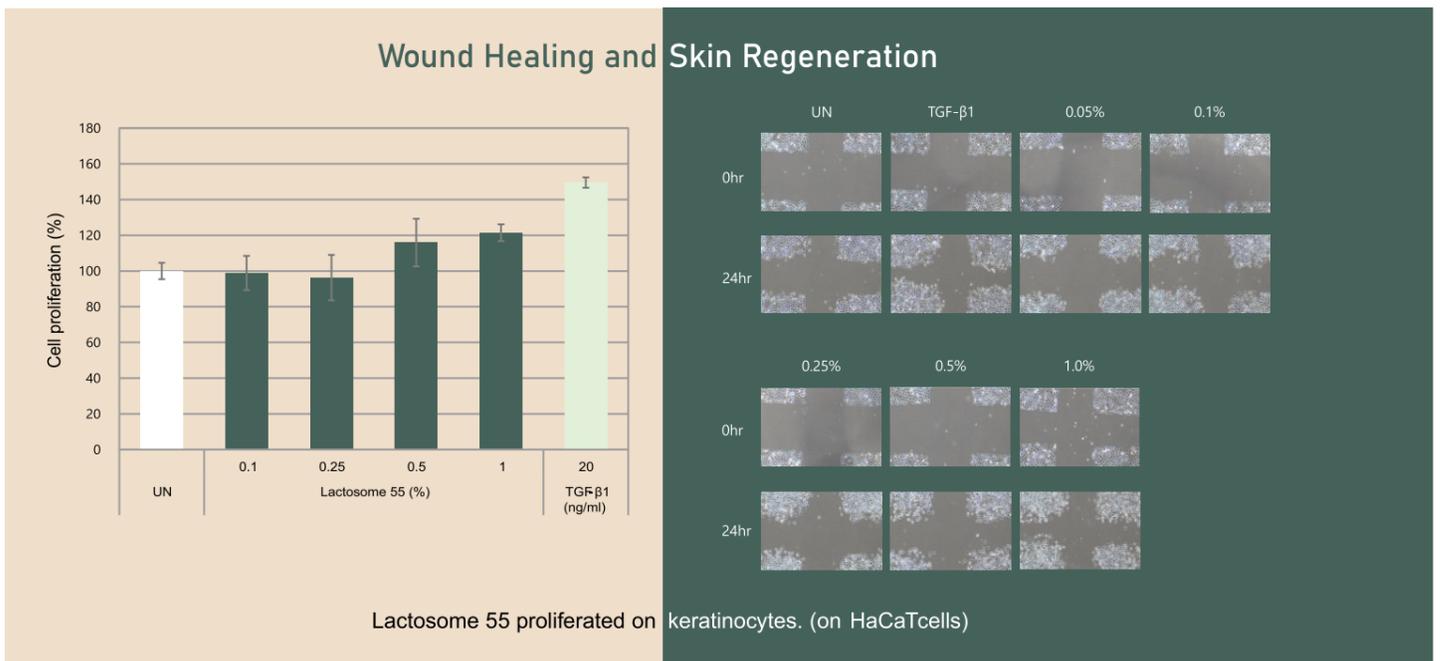

**Source:** Patented micro-organism Lactobacillus brevis J2K-55 **Size:** 128 nm (Avg)

**in-vitro efficacy**

**Ex-vivo efficacy**

### A) Skin regeneration

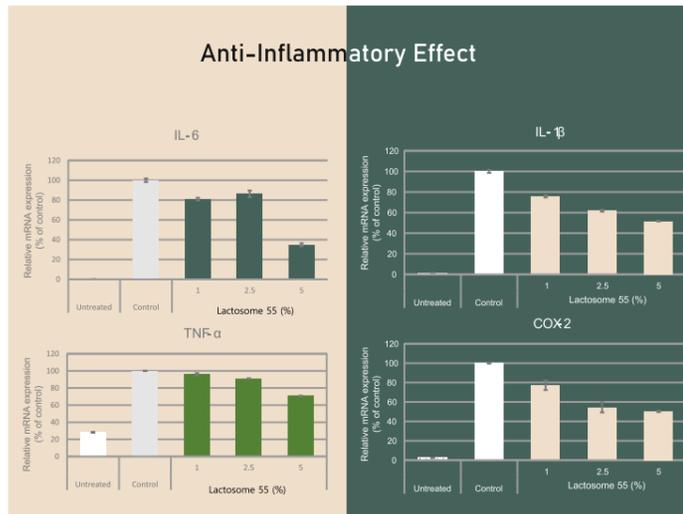

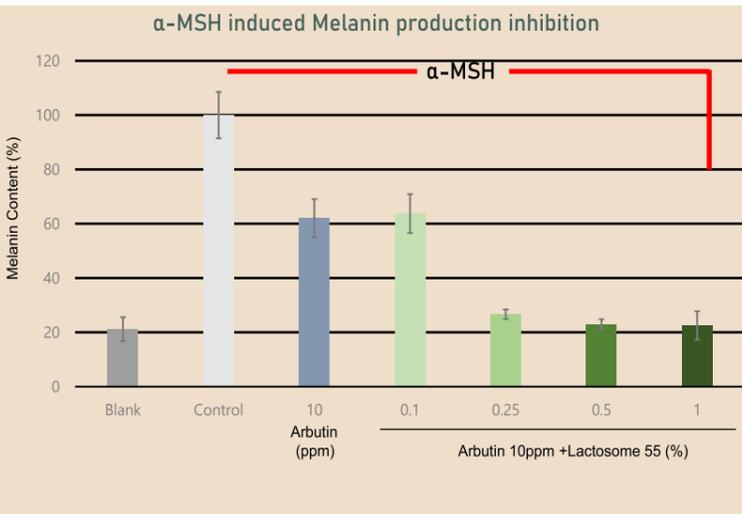

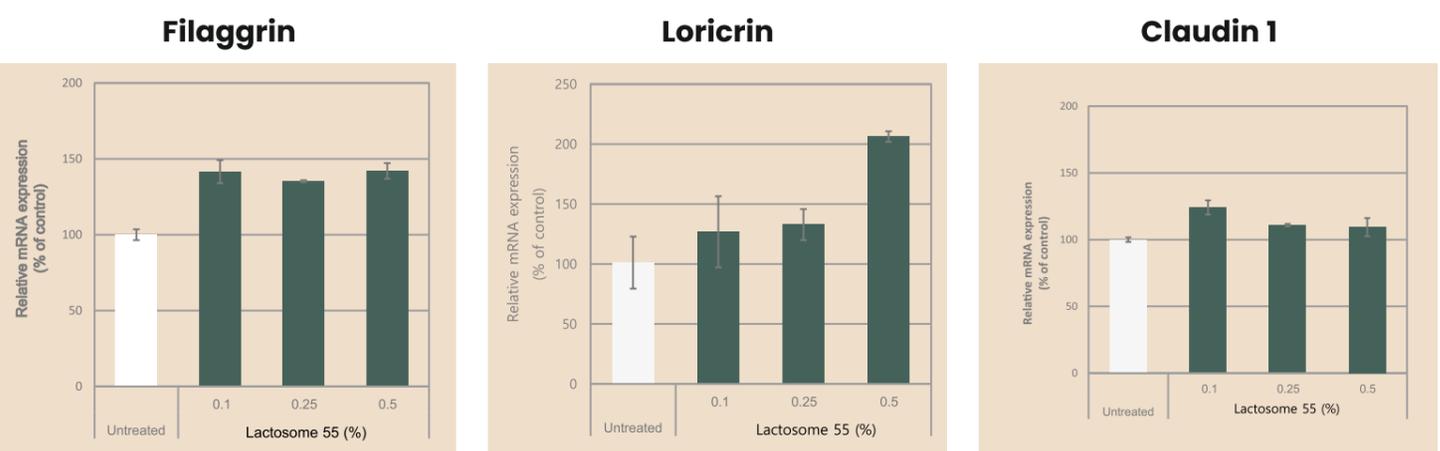

### A) Moisturizing + Barrier improvement measurement (Aquaporin-3)

### B) Skin barrier junction tightening

### B) Strong skin brightening effect

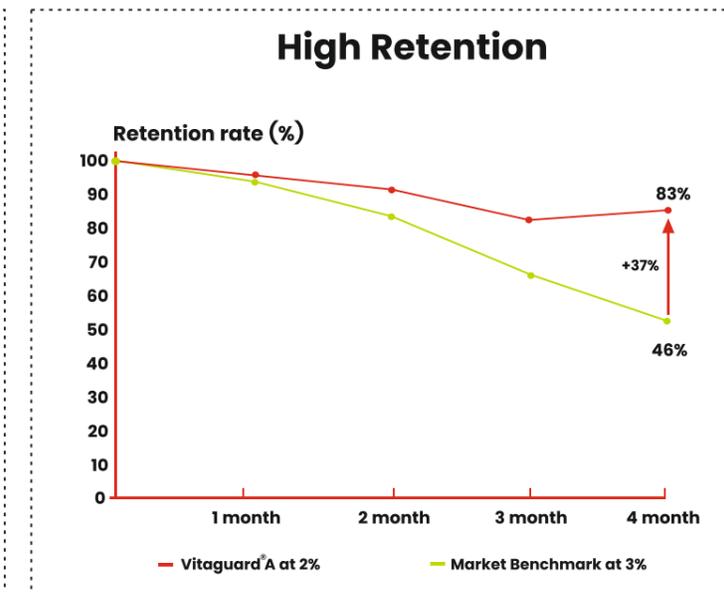

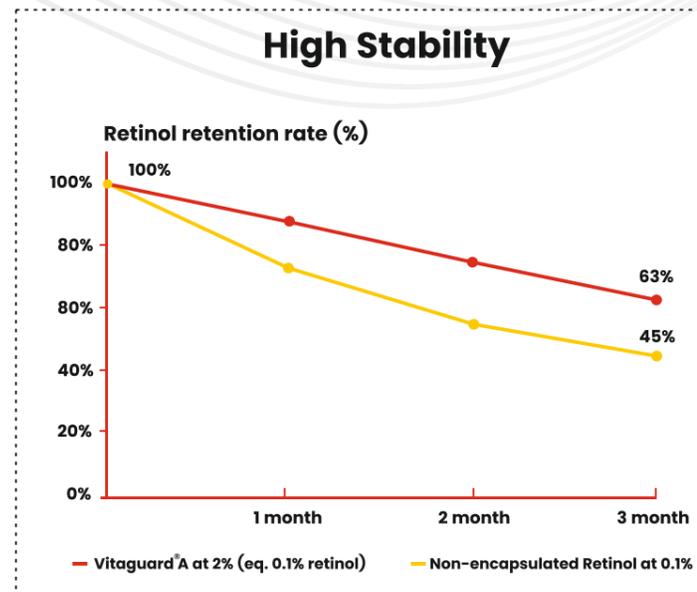

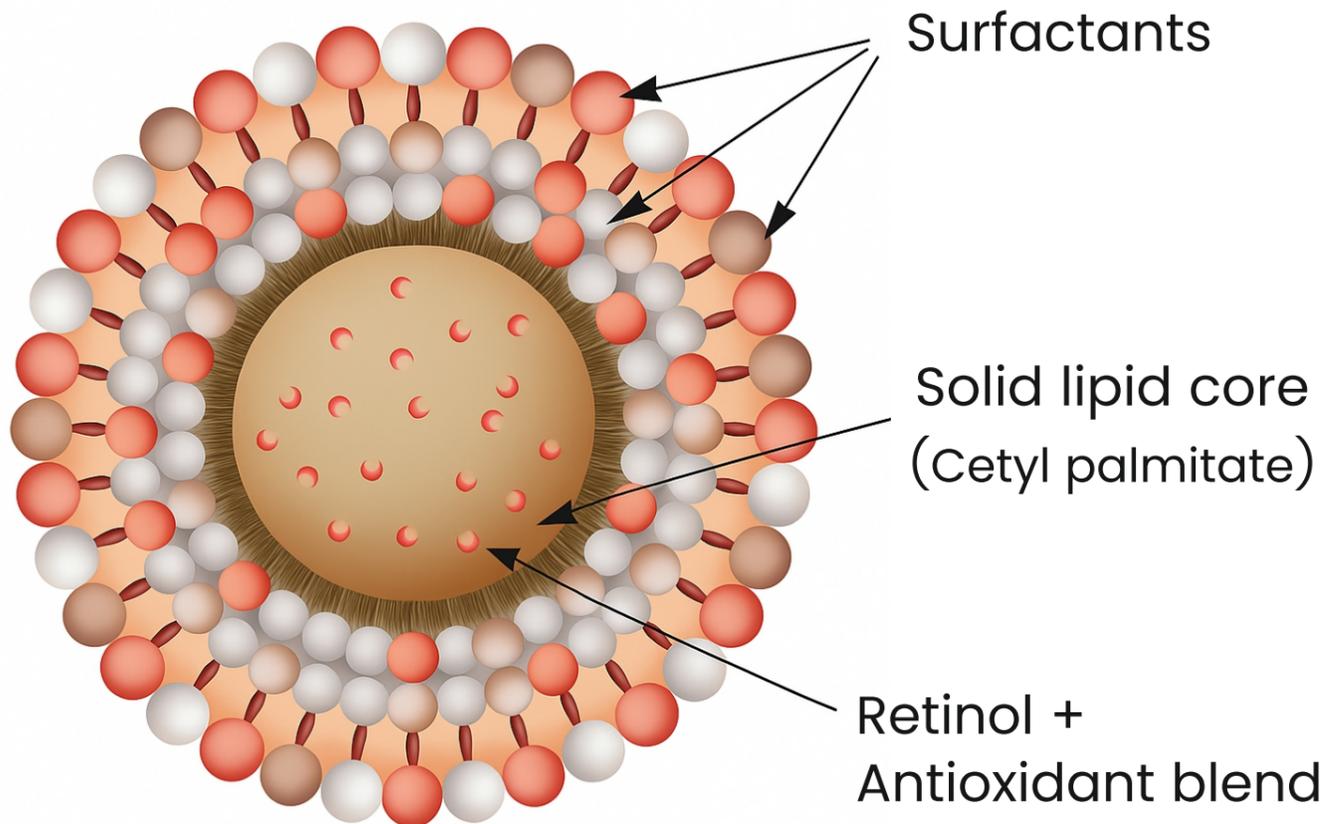

### C) Powerful anti-inflammatory effect

# Vitagaurd® A The ultimate encapsulated retinol

## DEMONSTRATED EFFICACIES

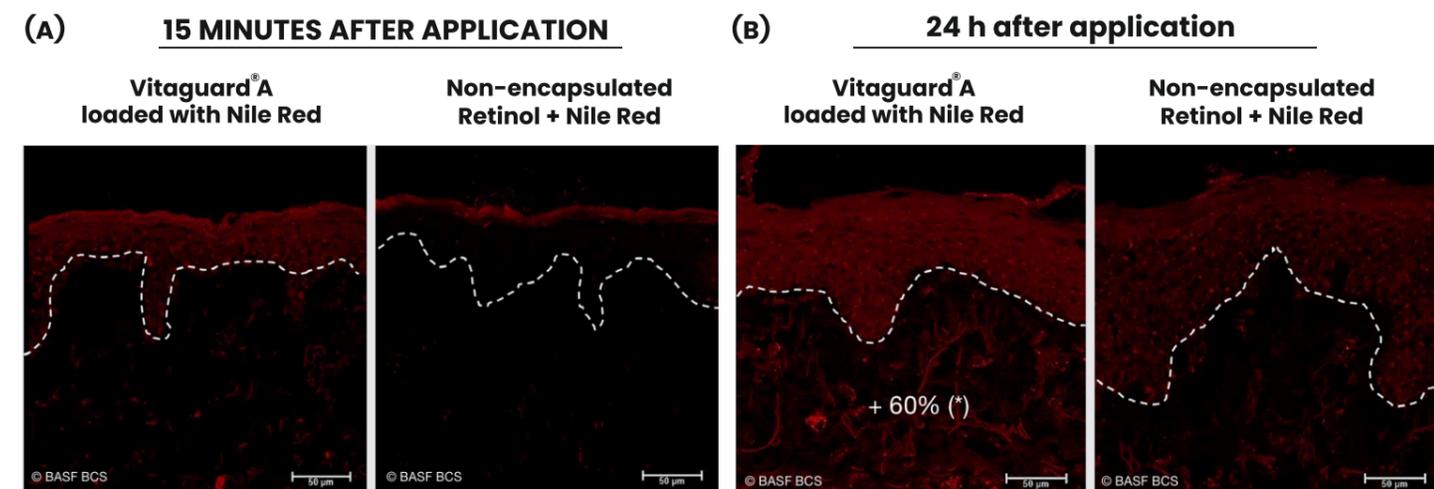

### A) Real life stability study

- Under real life hard conditions **Vitagaurd® A** showed 83% retention rate at room temperature
- Stable at 40° temperature

### B) Rapid Penetration

Patented **Vitagaurd® A** produced by PIT method Retinol with anti oxidant blend is entrapped into solid wax matrix surrounded by several surfactant layers

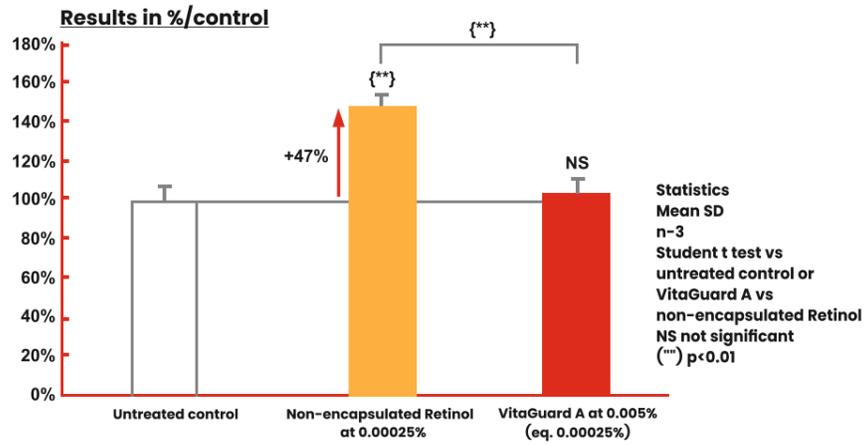

- Penetrates stratum corneum in just 15 minutes
- Penetrates dermis in just 24 hours

# Vitagaurd<sup>®</sup> A The ultimate encapsulated retinol

## C) Prevents from retinoid dermatitis

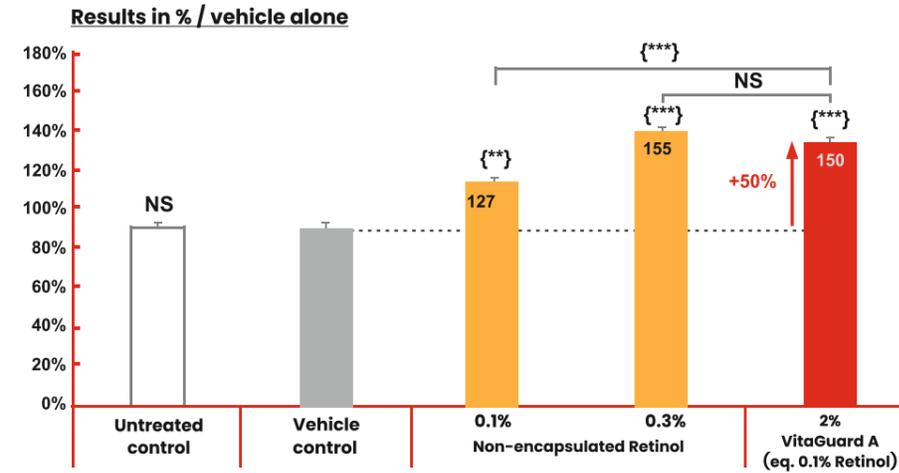

### Expression IL-8

- Avoids IL-8 secretion
- Limits skin irritation & promotes controlled absorption

## D) Increases epidermal thickness

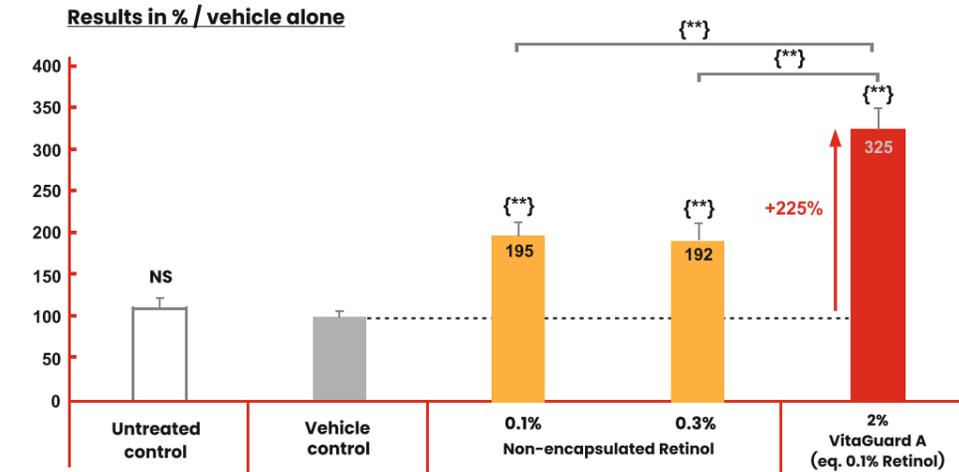

### Epidermal thickness

- Shown +50% increase in epidermal thickness than control vehicle

## E) Enhances filaggrin synthesis

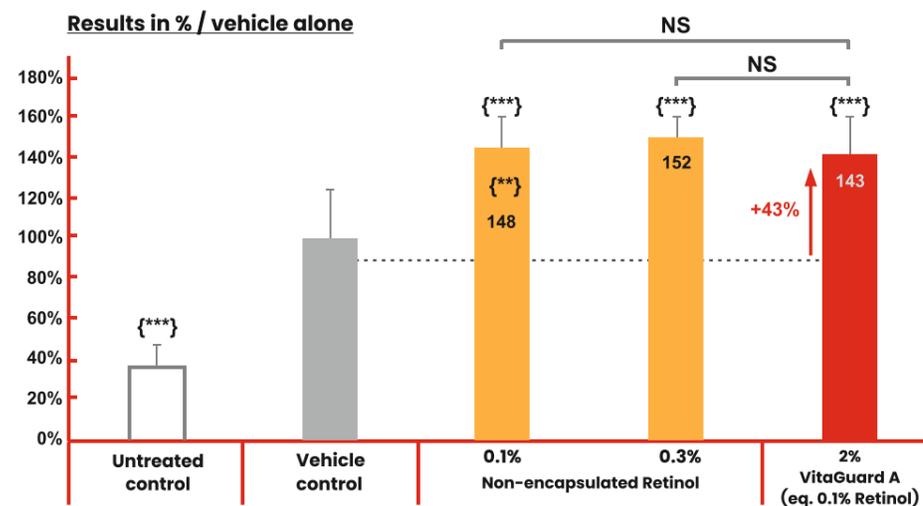

### Filaggrin synthesis

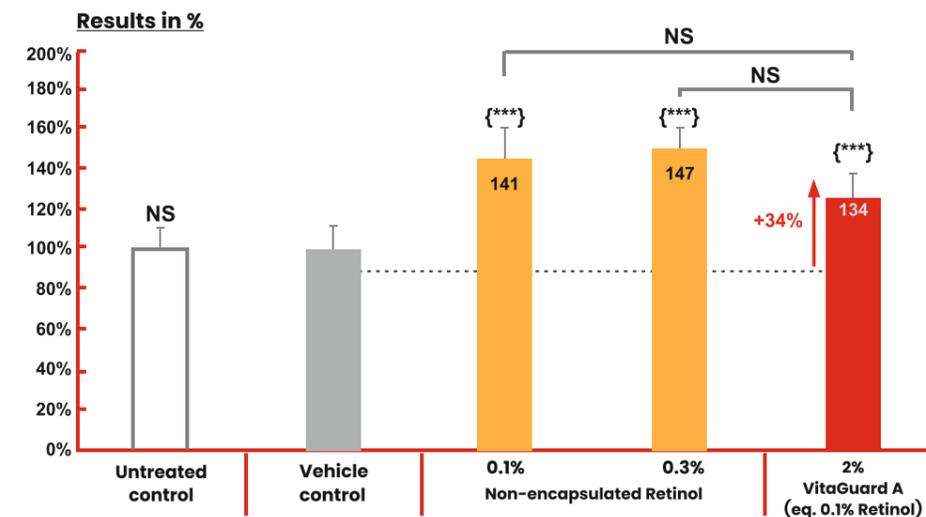

- Significantly increases filaggrin synthesis by +225%

## F) Stimulates collagen synthesis

### Collagen I synthesis

### Collagen III synthesis

- Stimulates type I & III collagen effectively

# Active Ingredients | Actions | Deep Penetration

<b>Vitagaurd<sup>®</sup> A</b>	<ul style="list-style-type: none"><li>● Patented retinol encapsulation that allows Deep penetration, high stability, bioavailability &amp; excellent Skin tolerance</li></ul>
<b>Lactosome 55</b>	<ul style="list-style-type: none"><li>● Compliments exfoliation Deep cellular regeneration</li><li>● Plumper &amp; more radiant complexion</li></ul>
<b>Vitamin C</b>	<ul style="list-style-type: none"><li>● Strong anti-oxidant</li><li>● Excellent anti ageing &amp; skin Lightening agent</li></ul>
<b>Lactic acid</b>	<ul style="list-style-type: none"><li>● Efficient exfoliator</li><li>● Treats photo damaged &amp; hyperpigmented skin</li></ul>
<b>Salicylic acid</b>	<ul style="list-style-type: none"><li>● Keratolytic &amp; efficient exfoliator</li><li>● Unclog pores, reduces sebum production</li></ul>
<b>Kojic acid</b>	<ul style="list-style-type: none"><li>● Inhibits production of tyrosinase</li><li>● Skin lightening agent</li></ul>
<b>Arbutin</b>	<ul style="list-style-type: none"><li>● Gives bright &amp; even skin tone</li><li>● Reduces scars</li></ul>
<b>Phytic acid</b>	<ul style="list-style-type: none"><li>● Efficient exfoliator</li><li>● Blocks the synthesis of melanin</li></ul>
<b>Mandelic acid</b>	<ul style="list-style-type: none"><li>● Antiacne</li><li>● Treats melasma</li><li>● Promotes even skin tone</li></ul>

**Triple Action** ▶

**Vitagaurd<sup>®</sup> A** ▶

**Lactosome 55** ▶

**Transcutol P** ▶

**Balanced acids** ▶

**Exfoliation**

**Depigmentation**

**Dermal Regeneration**

**Enhances stability, absorption & efficacy**  
**Prevents retinoid induced inflammation**

**Promotes tissue repair**  
**Reduces down time**

**USFDA approved | Safe & Effective**  
**Facilitates deep penetration of actives**

**Controlled & complete micro exfoliation**  
**AHA - Surface renewal + BHA - Deep renewal**  
**Safe on sensitive skin**

# INDICATIONS

## *Body*

- Nigrifican acanthosis
- Back darkening
- Elbow darkening
- Underarms darkening
- Lip darkening
- Knuckles darkening

## *Face*

- Hyperpigmentation & Skin lightening
- Reverses sun tan & facial photoaging
- Dark spot reduction
- Treats moderate inflammatory acne
- Skin Restructuring
- Skin with expression of wrinkles
- Skin aging manifestations
- Superficial Melasma

# Application Protocol

## ● 1. Priming

Day 1 to 21

Skin  
lightening  
cream

**1 FTU at**  
Night Daily

Break  
of  
**3**  
Days

## ● 2. Peeling

Day 25

**Step 1:** Cleanse the skin and remove excess sebum and cell debris

**Step 2:** Degrease the skin with an alcohol-free cleanser & toner

**Step 3:** Apply Retipeel Exo Peel forming a homogeneous layer & leave for 6-8 hours

**Step 4:** Clean the face with water. Do not clean the face with soap for next 5-6 Days.

Break  
of  
**7**  
Days

## ● 3. Post care

Day 33 Onward

1. Use moisturizer after bath
2. Use Sunscreen 30 Min. Before going out
3. Use Skin lightening 1 FTU at night daily

## General Precautions

Before and after a chemical peel, you should avoid any external stressors that can affect your skin. Besides, your new skin may be more sensitive for a few days

- Avoid sun exposure for at least two weeks before and after the peel.
- Do not use depilatory wax or other hair removal products for a week before and after the procedure.
- Patients who have been under Accutane medication should wait for at least 6 months after the last Accutane intake before a chemical peel
- Chemical peels are generally for professional use only. The procedure may be performed in-office by a skin expert
